

EMPLOYEE SPOTLIGHT

#EmployeeSpotlight

Meet City of Winter Springs Landscape Manager Kevin Maddox.

Kevin is approaching his 4 year anniversary with the City. As

a landscape manager, Kevin is responsible for the landscape beautification of the city. Kevin oversees the overall design of landscape throughout city parks, facilities, and roadways. He also does a lot of the city planting and tree replacements.

Kevin and his team maintain these designs to keep the plants healthy and the city looking beautiful.

You may see Kevin in your local park, operating heavy equipment or planting new trees. His favorite aspect of his job is the ability to use his creativity and artistic freedom!

Every year Kevin looks forward to the City's annual tree giveaway in celebration of Arbor Day. He

enjoys helping residents pick the perfect tree for their needs and property. This year his team is preparing to deliver over 1000 trees to

residents. Kevin and the Parks and Recreation team have really grown this program since its initial inception. The annual tree giveaway has quickly become many residents' favorite tradition.

In order to be successful in his role, Kevin maintains a lot of certifications and licenses, including Green Industry Management practices, horticulture certifications, and spray licenses. Even

when Kevin is off work, he still enjoys being outside, saying, **"I would say I am quite the outdoorsman, so when I am not at work, I am still trying to be in nature. I love to hunt and fish"**.

Thank you, Kevin, for being on the Winter Springs team!
