Winter Springs Boulevard speed limit changes to take effect June 19, 2023

WINTER SPRINGS, Fla.-- Construction of various safety enhancements along Winter Springs Boulevard have been underway since May 3, 2023, and residents are advised to take note of upcoming speed limit changes as part of those improvements.

Effective June 19, 2023, the speed limit along Winter Springs Boulevard will be reduced from 30 to 25 miles per hour, spanning from Tuskawilla Road to the City limits.

On [March 13](#), the City Commission approved the reduction in the speed limit during the regular commission meeting.

The decision to lower the speed limit was made to ensure greater consistency in speed limits along the roadway.

These changes coincide with the ongoing road resurfacing and safety enhancement project, which began on May 3, 2023.

The comprehensive improvements include the installation of new asphalt, raised intersections, speed tables, and designated 7-foot bike lanes.

This project, approved by the City Commission on February 27, is part of the City of Winter Springs 2023 Capital Improvement plan.

Funding for this initiative is provided through the one-cent local government infrastructure surtax.
