For questions or concerns, please contact Veolia's Wastewater Hotline for the City at 407-327-7579

**February 28, 2021 - March 6, 2021**

## **Sunday, 2/28/21**

- **Construction Update** - There is no construction work today. Both tanks at the plant are now back in service after completing a number of construction goals. Along with the new airline and renovated filters, more equipment is back on-line, and as a result, the biological process is responding well.
- **Odors** - This morning, odors are minimal. The winds are towards the northwest. Odors and wind direction may change throughout the day due to plant operations.
- **Reuse Water** - Reuse water continues to be unavailable to customers near the West Wastewater Plant, including the Seven Oaks and Greenspointe neighborhoods. Customers west of Shore Rd. including Seville will also be without water today due to maintenance work. The completion of repairs on the tank is helping to improve the water quality. A plan is in development to flush stagnant water from the reuse lines that have been off before turning the service back on. The flushing plan must be sent to the state for review before implementation. We will provide notice to the affected neighborhoods when reuse water is restored.

---

## **Monday, 3/1/21**

- **Construction Update** - This week, contractors will be finishing up work on different components. Both tanks at the plant are now back in service. With most of the equipment upgrades in place, the biological process is responding well.
  - **Odors** - This morning, odors are minimal. The winds are towards the northwest. Odors and wind direction may change throughout the day due to plant operations.
